## CHRIS SAMARINAS

innovation 4.0, 04-06, Singapore, 117602 chris.samarinas@gmail.com - algoprog.com

#### **SUMMARY**

Machine Learning researcher with focus on applications in Natural Language Processing (Information Retrieval, Information Extraction, Question Answering, Knowledge Graphs, Recommendation Systems). Solved challenging problems during my work at 3 AI start-ups and 3 universities. Upcoming PhD student at UMASS.

#### **EDUCATION**

#### University of Massachusetts Amherst, Amherst, USA

September 2021 – 2026 (expected)

M.Sc./PhD in Computer Science

Research in Information Retrieval / Extraction at the Center for Intelligent Information Retrieval (CIIR).

#### Imperial College London, London, United Kingdom

October 2017

Master of Science (M.Sc.) in Advanced Computing

- Attended courses towards an M.Sc. degree with main focus on Machine Learning.
- Thesis: Personalized news recommendations using neural networks

#### Aristotle University of Thessaloniki, Thessaloniki, Greece

October 2013 - Jun 2017

Bachelor of Science (B.Sc.) in Computer Science

- GPA: 9.67/10.00, ranked 1/120, highest GPA since 1992 out of 2,500+ CS graduates, top 0.04%
- Ranked 1/120 in national university entrance exam in my department and top 0.2% nationwide.
- Thesis: Mining answers from the web using information retrieval techniques and machine learning

#### WORK EXPERIENCE

**Ro5**, London, United Kingdom (remote) Machine Learning Consultant (Knowledge Graph) February 2021 – Present

- Ro5 is a biotechnology company that accelerates drug discovery, development, repurposing, and clinical trials.
- Responsible for the automated construction of a biomedical knowledge graph from research papers.

### National University of Singapore, Singapore

February 2020 - Present

Research Assistant

- Research on latent retrieval for large-scale fact-checking and question answering with prof. Wynne Hsu, president of IDS and prof. Mong Li Lee, president of CTIC. Published our work at IEEE ICTAI 2020.
- Developed a framework for large-scale semantic search that returns text snippets related to questions or statements and deployed it in a real-world semantic search engine for COVID-19, launched by the president of NUS.
- Research on *multi-stage evidence retrieval for large-scale fact-checking*.

# Plural AI, London, United Kingdom

October 2018 - January 2020

Research Engineer

- Plural AI is a fintech start-up that builds a knowledge engine for the finance industry. The company focuses on extracting content from corporate websites and financial statements to enrich a financial knowledge graph, and support question answering on complex financial queries.
- Developed a novel framework for *concept extraction* and *saliency scoring* from corporate websites. Owned the whole machine learning pipeline, from the annotation tool development and website crawling, to the productionization and deployment.
- Developed a smart tool for efficient curation of an industrial *category graph*.
- Developed a scalable semantic search service of companies using a novel topic modeling technique.

Research Engineer

- Donaco is an online advertising start-up that tries to revolutionize online donations.
- Designed a system for contextual recommendation of charity campaigns in news articles.

#### Freelance Software Engineer (early stuff)

2009 - November 2018

- My first YouTube utility app got over 1M downloads and was acquired by a small company in Poland.
- Developed a metasearch engine for a client in Germany.
- Developed a location-based web search interface for a client in Canada.
- Developed and sold a script that bypassed Google's Custom Search API limitations and offered an interface for 'instant search', which among others was also used by a company in Turkey that got \$2.5M government funding.
- I was a short-term contractor for the development of the new version of the historical HotBot metasearch engine.

#### **PUBLICATIONS**

**DEFAN: Explainable Fake News Detection Based on Content and Social Context** (in progress)

#### Improving Evidence Retrieval for Automated Explainable Fact-Checking

Chris Samarinas, Wynne Hsu, Mong Li Lee, system demonstration at NAACL 2021

#### Latent Retrieval for Large-Scale Fact-Checking and Question Answering with NLI Training

Chris Samarinas, Wynne Hsu, Mong Li Lee, long paper at *IEEE ICTAI 2020*, **25%** acceptance rate [code] [demo 1, demo 2] [news] [blog post]

## WAMBy: An Information Retrieval Approach to Web-Based Question Answering

Chris Samarinas, Grigorios Tsoumakas, long paper at SETN 2018, 33% acceptance rate

#### **SKILLS**

Programming languages	Python, Java, C, C++, Prolog

Web development JavaScript, HTML5, PHP, MySQL, MongoDB

Machine Learning Tensorflow, PyTorch

Others Kubernetes, neo4j, GCP, Latex, Android development

#### **AWARDS**

<b>Bioengineering Hackathon, 1st place,</b> <i>EMB IEEE Student Chapter AUTH, StudentGuru</i> , 1st place for developing DropSense in 48 hours, a platform that monitors and connects elderly with their relatives and paid carers using Wear OS smartwatches.	2018
<b>Hackathon Thessaloniki, Honor,</b> <i>Municipality of Thessaloniki</i> , awarded for developing CityReport in 24 hours, an online web application for instant issues reporting.	2014
<b>Great Moment for Education Scholarship, Award,</b> <i>Eurobank Ergasias</i> , scholarship for achieving the highest grade at school at the national university admission examination.	2013
<b>National Mathematical Olympiad, First Prize,</b> <i>Hellenic Mathematical Society</i> , awarded for competing in the final stage "Archimedes", top 50 out of over 20,000 participants.	2009

#### **GRANTS**

Tensorflow Research Cloud Program, Google	e, granted free access to TPU pods for 6 months for our project on	2020
large-scale latent retrieval		

**Innovate UK Smart Grant**, *UK Research and Innovation*, **1%** acceptance rate, £400,000 for our work at Plural AI, building a knowledge engine for the finance industry.

2019
